

BandSphere

Music catalog and rating platform

Large Music Catalog

BandSphere offers details on a wide variety of songs, artists, records, and more music info from all around the world.

Rating System

Users can publish their ratings and opinions on songs, albums and its editions, and additionally share their reviews with everyone.

Public Access API

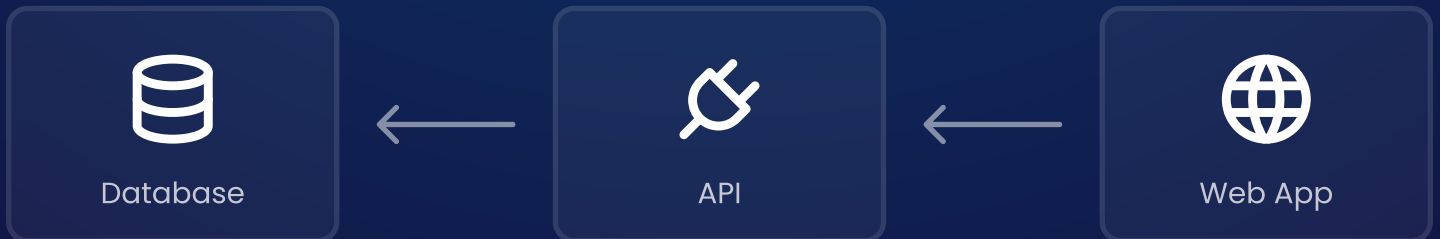

Developers are able to integrate their apps with our API. From fetching info to creating an alternative client for the platform.

Advanced Search

Find specific artists, albums, tracks and other items, down to specific details, like instruments, format, location, etc.
